

VALIDATION SERVICES

Safety for products and processes

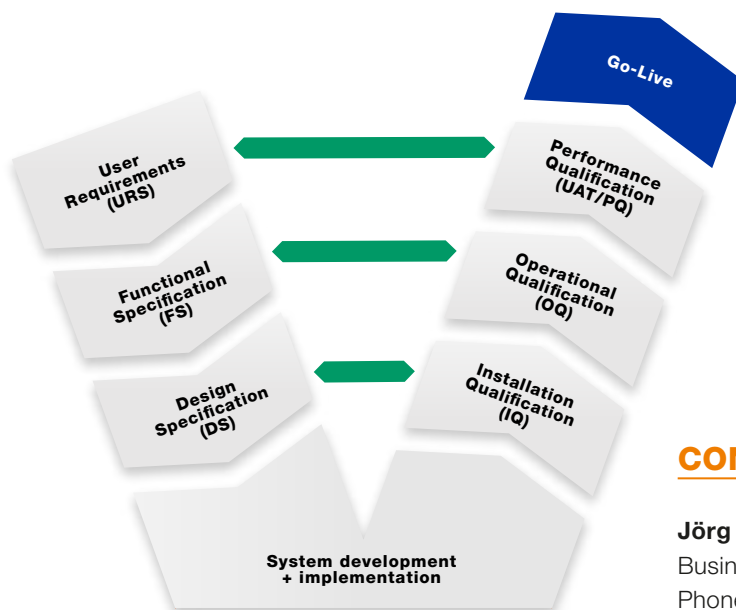

The minimization of business risks, stable manufacturing processes and product safety are just a few good reasons why Systec & Services' validation services are important for pharma, biotech, or the medical device industry. As experts with many years of experience in the validation of pharmaceutical processes, we support you in meeting the highest regulatory standards (GAMP®) on both national and international levels, whilst adapting to the changing regulatory landscape.

HOW SYSTEC & SERVICES SUPPORTS YOU

- Preparation of a quality project plan (QPP) as a definition of the project and validation strategy
- Computer-aided system validation (CSV) and certification, tailored to your requirements
- Complete audit management and support
- Preparation of standard operating procedures (SOPs)
- Seminar management and execution
- Tool implementation for quality management (QM) and validation processes
- Data integrity consulting

WHY SYSTEC & SERVICES IS THE RIGHT PARTNER FOR YOU

- Specialists in the life sciences validation field
- Scalable to meet the needs of small and midsize businesses up to the top 10 global pharmaceutical companies
- GAMP-5-based solution, use of the V-model
- A practice-proven, tool-based process
- Tailor-made computer system validation (CSV)
- Preparation, review and update of the validation master plan
